

All Green Recycling Inc. becomes pioneer for corporate social responsibility in Charlotte, NC with B Corp certification

All Green Recycling Inc. (AGR) is the first Certified B Corporation in Charlotte NC.

CHARLOTTE NC AUGUST 7, 2017

All Green Recycling an Environmental Technology Company, is proud to announce that it has become the first company in Charlotte NC to achieve B Corp certification.

The designation places it among an elite, vetted group of companies committed to being a force for good and creating value for society beyond profit alone.

Called “the highest standard for socially responsible business” by Inc. Magazine, B Corp certification recognizes companies who voluntarily meet standards of transparency, accountability and social impact. More than 2,200 companies across 50 countries and 130 industries are B Corp certified, including Warby Parker, Etsy, Chroma Technology, Ben & Jerry’s and Patagonia. 91% of Americans want to see more products and services support worthy causes.

“As clients look to corporations to take the lead in making our communities better, I felt it was important to be included in the certified B Corp family. All Green Recycling Inc. has deep commitments to the environment, the community and social responsibility. Having a zero footprint recycling facility, training and employing individuals with barriers, and helping to bridge the digital divide are just some of our corporate missions. Our IP process technology will have a great impact globally.” said Carol Jegou, Chairman and CEO, All Green Recycling, Inc.

All Green Recycling Inc. (AGR) (www.all-green.com) is an environmental technology company, privately held, nationally certified woman-owned and now a certified B Corp.

All Green Recycling is award winning, R-2 Certified Charlotte NC with an additional location in New Jersey. AGR provides recycling services to industry for the collection, re-use and recycling of retired electronics products with the focus on data security.

In addition, AGR has developed its own intellectual property (IP); patent pending technology, which extracts the valuable commodities (e.g. gold, silver,

palladium, platinum and copper) from circuit boards in an environmentally friendly closed loop system using no harsh chemicals like cyanide.

To become B Corp certified, companies must undergo and pass an assessment by B Lab that evaluates their mission, employment practices, governance structure, social impact and environmental stewardship. Certified B Corporations meet the highest standards of overall social and environmental performance, legally expand their corporate responsibilities to include consideration of stakeholder interests, and build collective voice through the power of the unifying goals. B Corporations are leaders of the global movement of People Using Business as a Force for Good.
